

Model DT-1

Drip Tray

SPECIFICATION

The 'Aqualarm' DT-1 drip tray is made of mild steel and finished in a durable powder coat. Cantilever wall brackets allow for easy positioning. The tray is designed with a movable back plate to allow the detector module to be mounted away from any water collected, and increase the visibility of the status LED on the module. Both 'cable' and 'point of use' type detectors can be used (sold separately), and are held in place by purpose made mounting holes, brackets, and clips.

A 22mm drain hole is fitted with a plastic bung to allow any water collected to be drained away in a controlled manner.

Data

Tray: -	Height:	50mm
	Length:	1200mm
	Depth:	220mm
Bracket: -	Total Height:	250mm (50mm above tray) (150mm below tray)
	Length:	50mm
