

STB SUPERCOAT

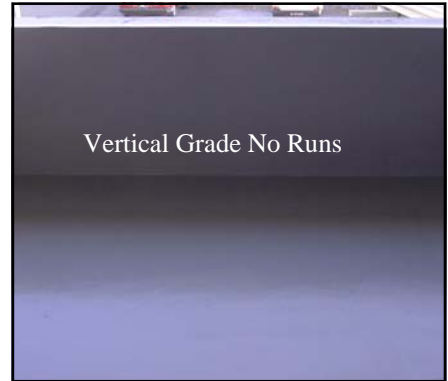

Solvent Free High Build Epoxy Coating For Walls And Floors

Anglo-Net STB Supercoat range consists of three grades:

- STB Supercoat 1** (100 microns)
- STB Supercoat 2** (200 microns)
- STB Supercoat Vertical** (150 microns)

STB Supercoat contains the latest generation of epoxy resins and thinners, but it's our new pigment technology that makes this a superior product. This also gives the following advantageous benefits:

- **Greater Economy**
- **Improved Mixing**
- **Better Coverage**
- **Greater Opacity**
- **Can Apply *Stop Slip* For Improved Grip**

Typical Applications.

STB Supercoat 1, 2 and Vertical Grade coatings are used in areas requiring good wear and chemical resistance. They are suitable for use in food processing areas, laboratories, toilet blocks, warehousing, car showrooms, colleges, schools, chemical and engineering plants.

STB Supercoat 1 gives superior physical and chemical resistance than **STB Supercoat 2**
STB Supercoat 2 should be used when a thicker build is required.

Vertical Grade should only be applied to vertical surfaces
